## Athletic Field Marking Paint

**Description:** Coronado's Athletic Field Marking Paint is produced using a heavy duty vinyl designed to give longer lasting marking lines, sideline stripes, end zone graphics and other marking effects on grass, dirt, composition or concrete surfaces. This product may be used interior or exterior and is more weather resistant and durable than other types of field marking materials. This non-flammable striping material is non-dusting, windproof and is non-irritating to eyes and skin. May be safely stored inside and does not harm grass or turf.

**Recommended Uses:** May be used on grass, dirt, composition and concrete surfaces providing a tough, durable non-permanent line. For use on all types of field marking such as football, baseball, lacrosse, soccer, field hockey, and track. For interior or exterior use in stadiums, coliseums, field house parks and playgrounds.

**Surface Preparation:** Synthetic turf, concrete and composition surfaces shall be clean and free of oil, grease, wax or any other contaminant that can serve as a bond breaker for the coating. Grass should be cut short for best results.

**Application:** These coatings are designed to be applied by various application methods such as wet line marking devices, hand applicators, rollers, spray guns and other devices. Stir thoroughly to a uniform consistency to insure uninterrupted application. Speed of application determines the thickness of the dry film and the spread rate. Apply only when surface temperature is above 50°F.

**Equipment Clean-Up:** Clean all equipment immediately after use with soapy water and a stiff bristle brush.

### Ready to Use

Product Number: 58-101 White  
58-156 Yellow (Lead Free)

Spread Rate: Up to 1200 linear feet per gallon depending on thinning, application method and width of stripe.

Colors: Stocked in white and yellow. Bright or contrasting colors may be tinted using universal colorants.

Finish: Opaque flat

Dry Time: Dries in 30 minutes. (70°F 50% relative humidity) May be recoated in one hour, if needed.

### Concentrated

Product Number: 944-1

Mixing Ratio: 3 gallons of water to one gallon of paste.

Spread Rate: Up to 1200 linear feet per gallon of mixed product depending on application method and width of stripe.

Colors: Stocked in white. Bright or contrasting colors may be tinted using universal colorants.

Finish: Opaque flat

Dry Time: Dries in 30 minutes. (70°F 50% relative humidity) May be recoated in one hour, if needed.
